Clustered Data ONTAP for Unified Manager data collector

This data collector collects clustered Data ONTAP 8.1.x data from the Unified Manager (UM) 6.0+ database. Using this data collector, Cloud Insights discovers all clusters configured and populated in UM. For efficiency, Cloud Insights does not call ZAPIs on the cluster itself. Performance is not supported in this data collector.

Configuration

Field	Description
Unified Manager IP	IP address or fully-qualified domain name of the Unified Manager
User Name	User name for the Unified Manager
Password	Password for the Unified Manager
Port	Port used for communication with the Unified Manager (default 3306)

Advanced Configuration

Field	Description
Inventory Poll Interval (min)	The default is 15 minutes
Exclude Clusters	Comma-separated list of cluster IPs to exclude
