Lenovo HX data collector

The Lenovo HX data collector acquires inventory and performance information from Lenovo HX storage systems.

Requirements

The following information is required to configure this data collector:

- A unique name for the data collector
- The acquisition unit associated with the data collector
- TCP Port requirement 9440

Terminology

Cloud Insights acquires the following inventory and performance information from the Lenovo HX data collector. For each asset type acquired by Cloud Insights, the most common terminology used for this asset is shown. When viewing or troubleshooting this data collector, keep the following terminology in mind:

Vendor/Model Term	Cloud Insights Term
Storage Pool	Storage Pool
Container	Internal Volume
Node	Controller
Share	File Share
Nutanix Distributed File System (NDFS)	Share
Volume Group	Backend LUN

Configuration

Field	Description
Prism External IP Address	IP address used to connect to the storage system
User Name	User naame to log in to storage system. The default is admin.
Password	Password for the Lenovo HX storage system

Advanced configuration

Field	Description
TCP Port	TCP Port used to connect to Lenovo HX. The default is 9440.
Inventory Poll Interval	Interval between inventory polls. The default is 60 minutes.
